

# Triples

by Ivan Smason

You hit the ball well and you're at Third Base

In Baseball:

A Triple is a batted hit

Which results with the batter

"Cleanly" safe at Third Base

He, or she can have

A dirty uniform, you understand?

But really, a Triple is a Double

That's batted by a fast guy

Or an inside-the-park Home Run

Or an equivalent of that

Batted by a slow guy, like me

If runners were already on base

When you hit your Triple, then

You earned some Runs Batted In, RBIs

It's exciting to be at Third Base

Because you're almost home, almost

But Third Base is called

The Hot Corner of the Baseball Diamond

For a very valid reason

It's dangerous for everybody

Around Third Base

It's exciting and dangerous

Your own teammate may

Bat a line drive right at you

He or she may not have meant

To do that, you understand?
